

WMG Green Infrastructure Webinar Series

Green Infrastructure Case Studies

From Tucson, Portland, and Austin

February 23, 2011, 5:30 – 7:00 PM (MST)

Green infrastructure...

- Manages stormwater and enhances communities by designing with nature
- Grows vegetation that provides habitat, shade, and community livability
- Enhances water quality and reduces flooding, and much more!

Join in if you...

- Want to improve the quality of life in your neighborhood and community
- Are interested in environmental sustainability, community development, urban design, or neighborhood activism
- Want to learn to implement these practices in your own community

Speakers from Tucson, AZ; Portland, OR; and Austin, TX will present different approaches their communities have taken to implement green infrastructure; as well as their successes, challenges, and next steps. Speakers include David Elkin, Landscape Architect with Greenworks (Portland), Mike Kelly, Civil Engineer - City of Austin, TX, and James MacAdam, Watershed Management Group - Green Streets Program Manager (Tucson). The program will include a short introduction to green infrastructure concepts and practices, and a moderated Q&A will be available to public participants.

This series is free and open to anyone!

To register: visit <http://watershedmg.org/green-streets>.
