

Watershed Management Group

Position Description

Position Title: River Restoration Planning, Site Assessment, Design and Implementation Intern

Supervisor: Trevor Hare, Restoration Director

Status: Internship, part-time

Hours: 10 hours/week

Benefits: Alternative transportation benefits, free admission into our Field Studies classes

Summary:

The River Restoration intern will be part of the WMG team working on the River Run Network (RRN) program to restore flow to Tucson's springs, creeks, and rivers. They will assist through hands-on restoration planning and implementation activities, citizen science monitoring and education programs, and watershed research and analysis to support river restoration plans.

Duties & Responsibilities:

- Help with RRN special events such as major donor tours and creek walks
- Attend the River Run Network team meetings
- Attend 1-3 WMG events a month to promote signups for the RRN; including Living Lab tours and water harvesting rebate classes
- Help out with Living Lab projects on an as-needed basis
- Help with Flow 365 monitoring project on an as-needed basis
- Help with grant writing/reporting, including map production
- Help with assessment, design, and planning of restoration treatments
- Help with restoration work in the field when appropriate

Job Requirements

- Interest and support of WMG's mission.
- Ability to work independently.
- Excellent communication and writing skills.
- Promptness and sound organizational skills.
- Proficient in Google Docs, Microsoft Office Suite, and Google Earth/Arc GIS.

Preferred Experience

- College degree or currently enrolled in a degree program related to environmental science, environmental education, or a related field.
